SKHS Teaching Fellow

Positions Available for 2019-2020

POSTED: 13 February 2019

FALL 2019 – No requirements at this time

WINTER TERM 2020

**HLTH 101/3.0 – Social Determinants of Health (ASO online version)**
This course introduces students to basic concepts in public, population and global health, and introduces social determinants of health, such as poverty, income inequality, and racism, in Canadian and global contexts. NOTE: Offered online via Arts & Science Online (ASO). Consult Arts & Science Online.
Term: Winter 2020
Projected Enrolment: 200 students

**HLTH 270/3.0 – Movement Behaviours and Health**
Movement is on a continuum that includes sleep, sedentary behaviour, and physical activity. This course will use primary prevention and life course approaches to study movement behaviour levels of the population, the influence of movement behaviours on health, and strategies for intervening on movement behaviours.
Term: Winter 2020
Projected Enrolment: 170 students

**KNPE 125/3.0 – Introduction to Human Physiology**
This course provides an introduction to human physiology from the cellular to the systemic level with special emphasis on the systems that adapt to exercise stress. The following areas will be covered: the cell, nervous system, skeletal muscle system, respiratory system, cardiovascular system, neuroendocrine system, and renal system.
Term: Winter 2020
Projected Enrolment: 250 students

Summer Term 2020

**HLTH 101/3.0 – Social Determinants of Health (ASO online version)**
This course introduces students to basic concepts in public, population and global health, and introduces social determinants of health, such as poverty, income inequality, and racism, in Canadian and global contexts. NOTE: Offered online via ASO. Consult Arts & Science Online.
Term: Summer 2020
Projected Enrolment: 200 students
