SKHS Teaching Fellow

Positions Available for 2018-2019

POSTED: 29 March 2018

FALL 2018

HLTH 334/3.0 - The Politics of Health & Illness
Explores cultural meanings of health and illness, the power dynamics through which these meanings are constructed, and related injustices in bodily experiences.
Term: Fall 2018
Projected Enrolment: 88 students

KNPE 153/3.0 – Introductory Biomechanics
This course will present the fundamentals of biomechanics which includes an understanding of joint structure and function, forces and moments, tools used to record motion and use of these tools for description of motion and skill evaluation.
Term: Fall 2018
Projected Enrolment: 175 students

KNPE 237/3.0 – Child and Adolescent Motor Development
This course is an exploration of behavioural and biological research on physical activity and how it relates to the psychosocial, structural, and physiological development of children between birth and approximately age 13.
Term: Fall 2018
Projected Enrolment: 70 students

KNPE 265/3.0 – Psychology of Sport and Exercise
This course will introduce both theoretical and applied/professional aspects of human social behaviour in sport and exercise.
Term: Fall 2018
Projected Enrolment: 185 students

KNPE 400/3.0 – Professional Practice in Allied Health
Through problem-based learning, students will gain an understanding of what it means to be an applied health care professional. Students will work collaboratively on case studies and develop critical thinking skills to prepare them as they transition to their careers as health care practitioners.
Term: Fall 2018
Projected Enrolment: 150 students
WINTER TERM 2019

**HLTH 101/3.0 – Social Determinants of Health (CDS online version)**
This course introduces students to basic concepts in public, population and global health, and introduces social determinants of health, such as poverty, income inequality, and racism, in Canadian and global contexts. NOTE: Offered online via CDS. Consult Continuing and Distance Studies.
Term: Winter 2019
Projected Enrolment: 200 students

**KNPE 125/3.0 – Introduction to Human Physiology**
This course provides an introduction to human physiology from the cellular to the systemic level with special emphasis on the systems that adapt to exercise stress. The following areas will be covered: the cell, nervous system, skeletal muscle system, respiratory system, cardiovascular system, neuroendocrine system, and renal system.
Term: Winter 2019
Projected Enrolment: 250 students
