| <p>Course Description:</p> <p>An introduction to the analysis of data from real life situations. Covers study design, descriptive and inferential statistics. Topics include probability, t-tests, regression, Chi-square tests, analysis of variance. Emphasis is in the foundation of statistical inference and practical application of statistical methods using statistical software.</p> <p>The purpose of this course is to improve your numeracy and critical thinking skills to help you make better decisions in your professional and personal life. To achieve this, you will learn about probability, how to make sense of raw data, how best to describe data to others, and how to test hypotheses using statistics. The components of this course have been designed with care to maximize your opportunities to learn in an engaging and supportive environment.</p> | | <p>Course Material:</p> <ol style="list-style-type: none"> 1. The first is an ebook entitled "Taking the Anxiety out of Statistics" by Nelson & Beyer (Kendall Hunt Publishing). Queen's students can purchase a special subscription rate here. Note that no royalties are collected on this ebook. 2. The second is a Top Hat account for active learning during lectures. https://tophat.com/ You will receive an email inviting you to join the Top Hat course. 3. Software skills guides will be available in onQ. The course uses Microsoft Excel and RStudio, both of which are free for students. | | | | | | | | | | | | |
