ANNUAL REPORT

for the

School of Kinesiology and Health Studies

2013

Acting Director's Statement

I am pleased to introduce the 2013 Annual Report for the School of Kinesiology and Health Studies. The report highlights the ongoing achievements of our faculty members, staff, and students in research, teaching, and learning. It also acknowledges the service contributions members of the School make to individuals and communities in Kingston, nationally and around the world.

Highlights from 2013 include:

- Three undergraduate programs that remain in great demand, with approximately 800 students enrolled across Kinesiology, Physical and Health Education, and Health Studies. Students consistently secure a high level of membership on the Dean's Honour List and Dean's Honour List with Distinction and are successful in obtaining spots in range of graduate and professional degree programs, as well as in full time employment.

- A graduate program that continues to grow, with a total of 96 full-time students in 2013, an increase of 20 students from 2012. Over the course of the year, 14 master's candidates and 6 doctoral candidates completed their degrees.

- The enhancement of the School's research program by $3.5 million in new funding in the form of 23 new grants. Ongoing research activities in the School are supported by a total of $18.5 million.

- The awarding of a Canada Research Chair, Tier II in Marginalized Populations and Health to the School, a position that will further enhance our research capacity and profile in the field of health equity.

- After more than 33 years of service, Dr. Joan Stevenson retired in June 2013, though she remains almost a daily visitor to the School as she continues to pursue research activities as an emeritus professor.

TABLE OF CONTENTS

Section	Description	Page #
1	**Undergraduate Programs** ▪ Kinesiology Program (KINE) ▪ Physical and Health Education Program (BPHE) ▪ Health Studies Program (HLTH)	**4 - 9**
2	**Graduate Programs (MA, MSc and PhD)** **Areas of Expertise** ▪ Biomechanics/Ergonomics ▪ Exercise Physiology ▪ Health Promotion ▪ Physical Activity Epidemiology ▪ Sport Psychology ▪ Socio-Cultural Studies of Sport, Health and the Body	**10 - 17**
3	**People Profiles** ▪ Faculty Members ▪ Continuing Adjuncts ▪ Adjuncts ▪ Administrative Staff, Adjuncts, Research and Technical Staff, Postdoctoral Fellows, and Cross-Appointments	**18 - 27**
4	**Teaching** ▪ Teaching Assignments ▪ Honours and Awards	**28 - 29**
5	**Research / Grants Activity**	**30 - 34**
6	**Research Publications, Presentations and Related Activities** ▪ Donald Macintosh Conference	**35 - 51**

1a) Undergraduate Programs

Undergraduate Programs

The School administers two professional, accredited undergraduate degree programs, in addition to the Health Studies Arts Program.

1. Kinesiology

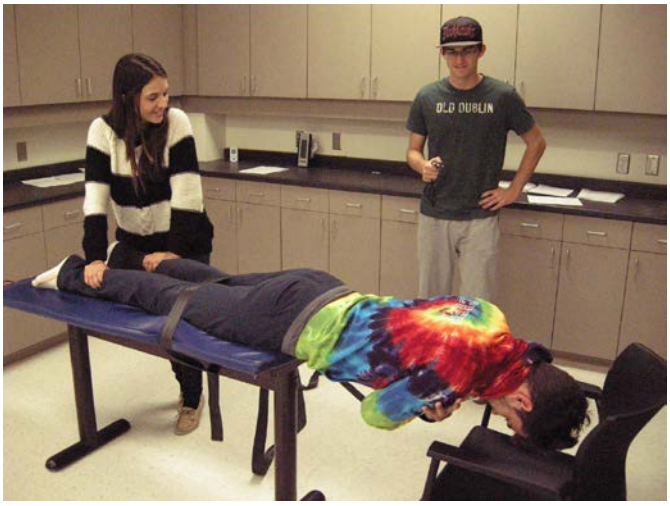
- BSCH KINE Bachelor of Science Honours in Kinesiology

2. Physical and Health Education

- BPHEH Bachelor of Physical and Health Education (Honours)

Orientation Week 2013

The School welcomed the incoming Physical Education and Kinesiology classes through an Orientation program that included two days off campus at Camp Oconto near Sharbot Lake, ON. Camp Oconto, which also serves as the host site for our PACT 338 Outdoor Education program, provides a venue where first-year students are welcomed into the School of Kinesiology and Health Studies away from the hustle and bustle of campus. The SKHS Undergraduate Coordinator and the Outdoor Education instructor served as the on-site supervisory staff at Camp Oconto during these two days of Orientation programming. In addition, they conduct leader training with the PHE/KIN Orientation Executive and leaders.



Students at work in KNPE 355, *Clinical Fitness Assessment Laboratory*.

Undergraduate Enrolment by Year for 2013-14

	Male	Female	BSCH KINE			BPHEH			Year Total

CONGRATULATIONS 2012-13 SKHS Major Award Winners

PHE 50th Reunion Volunteer Recognition – Second Year: Adam Beaudoin

PHE 50th Reunion Volunteer Recognition – Third Year: Erica Pascoal

PHE Canada Undergraduate Student Award: Cara Coghlan

Stephen J. Hobbs Award: Caileigh Simpson

Don Krestel Memorial Award: Catherine Landells

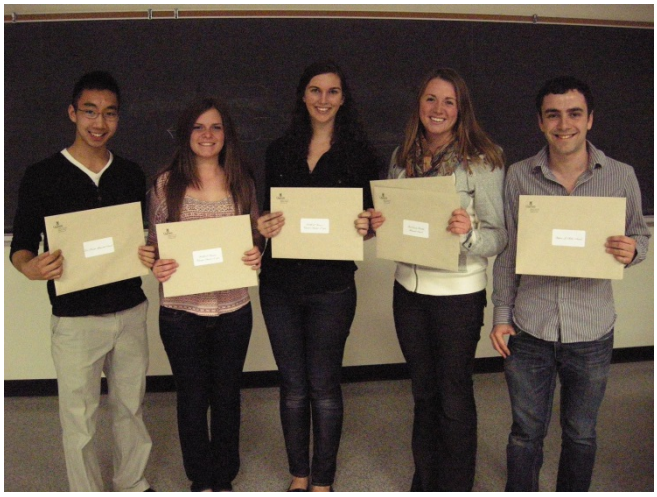
Danielle Polk Memorial Award: Sarah McLean

Fred Lamble Bartlett Award: Savannah Silva

Teaching Awards

PHE '88 Excellence in Teaching Awards
Theory Courses: Steve Fischer
Activity Courses: Bill Sparrow

HLTH DSC Excellence in Teaching Award for Health Studies: Samantha King



CSEP Medallion	Jeremy Antonyshyn
PHE '75 Book Prize	Alison Schwichtenberg
Reuben Wells Leonard – entering 3rd year	Emily Quick
Reuben Wells Leonard – entering 4th year	Rachel Boyle
Ron Stewart Physical Education Prize	Paolo Pianosi
Medal in Kinesiology and Health Studies	

1b) Health Studies Program

Degrees offered:

1. **BAH MIN HLTH** — Bachelor of Arts Minor (3 years: 15.0 credits)
2. **BAH MED HLTH** — Bachelor of Arts Honours Medial in Health Studies (4 years; 19.0 credits)
3. **BAH MED HLTH** — Bachelor of Arts Honours Major in Health Studies (4 years; 19.0 credits

Graduation Summary – Health Studies

	BAH MAJ HLTH		BAH MED HLTH		BA MIN HLTH		
	ELIG	DIST	ELIG	DIST	ELIG	DIST	TOTAL
2013	**47**	**7**	**6**	**0**	**22**	**2**	**84**
2012	46	5	7	0	12	0	70
2011	36	11	9	1	14	6	77
2010	27	3	4	2	18	7	61
2009	33	5	11	3	24	7	83

Student Accomplishments

PHEKSA Executive 2013-14

Students in the School are highly involved in campus life and within the Kingston community. Approximately thirty percent of the students in the BPHE, BPHE(H) and BSCH KINE programs are members of a varsity team or competitive club. Many are also involved in one capacity or another in intramural sports, fitness leadership and recreational sports. A significant number are employed in capacities related to the delivery of the Athletics and Recreation program (e.g. student trainers, fitness instructors, lifeguards, event staff, camp staff, intramural officials, etc.) Students in the Physical Education and Kinesiology programs are also very active in on-campus organizations and initiatives (such as PHE/KIN Orientation, Best Buddies, Student Constables, Queen's First Aid, etc.). Finally, over 100 PHE/KIN students are involved in the annual Winter Adapted Games, an event begun in 1990 under the direction of Undergraduate Coordinator Kathy Jackson.

2013-14 PHEKSA Executive			
Executive		**Operations**	
President	Savannah Silva	Equity and Wellness/ASUS	Jennifer Simpson
VP University Affairs	Victoria Law	Social Director	Joshua Moulton
VP Operations	Sarah McLean	Director of External Affairs	Molly Scott
Communications	Amin Bozorgzad	Sr. Activities	Morgan Morris-Pocock

Year Reps		Sr. Academics	Mario Rotundo

1st year reps	Logan Barr	Sr. BEWIC	Kasha Lee
	Simone Wright Stein	Jr. Academics	Angie Travlos
		Jr. Activities	Kathleen Hogan
		Jr. BEWIC	Alice Bifield
		Jr. BEWIC	Cassie Persoon

HLTH DSC Executive

In its sixth year of existence, the HLTH DSC was actively involved in a variety of career mentoring activities including the several career-related workshops. In addition to sitting on administrative committees (*Curriculum/Academic Council),* volunteering for recruiting (*OUF/Fall Preview/March Break)* and assisting with USAT evaluations – they competed at BEWIC, raised funds for charity, held a *Pizza with Profs* information session and sponsored an end-of-the year dinner.

2. Graduate Programs

The School offers graduate-level, thesis-based programs at both the Master's (2 year program) and Doctoral (4 year program) level. All students receive their degree in Kinesiology and Health Studies.

Areas of expertise include:

Biomechanics (MSc / PhD)
Exercise Physiology (MSc / PhD)
Health Promotion (MSc / PhD)
Sport Psychology (MSc / PhD)
Ergonomics (MSc / PhD)
Physical Activity Epidemiology (MSc / PhD)
Socio-cultural Studies of Sport, Health and the Body (MA / PhD)

Graduate Program Goals Statement

To develop intellectual curiosity
To develop effective researchers and educators
To develop independent thinkers/workers
To develop communication and collaboration skills

Graduate Orientation Week

The Graduate Orientation Week is conducted the first week of September. Activities include sessions on goals, expectations, health and safety protocols, building tour, life as a graduate student, funding information, human research ethics policies and tutorial, accessibility policies and tutorial, an interactive teaching assistant roundtable discussion, and several social events led by staff and continuing graduate students.

Graduate Student Funding Award Recipients 2013	
Veronica Allan	SSHRC Master's (Joseph Armand Bombardier CGS Master's Scholarship)
Colin Baillie	CIHR Master's (Frederick Banting and Charles Best Canada Graduate Scholarship (CGS M)
Emma Bassett	OGS (Ontario Graduate Scholarship)
Susan Belyea	Morgan Brown Scholarship
Robert Bentley	OGS (Ontario Graduate Scholarship)
Jennifer Brady	SSHRC CGS Doctoral Award (Frederick Banting and Charles Best Canada Graduate Scholarship)
Frances Browning	OGS (Ontario Graduate Scholarship)
Scott Carey	SSHRC CGS Doctoral Award (Frederick Banting and Charles Best Canada Graduate Scholarship)
Ira Carson	NSERC Master's (Natural Sciences and Engineering Research Council of Canada (CGS M)
Theresa Cowan	Graduate Entrance Tuition Award
Brittany Edgett	OGS (Ontario Graduate Scholarship)
Alyssa Fenuta	Bruce Mitchell Academic Leadership Award
Karla Galaviz	CONACYT Mexico
Ashley Johnson	R.S. McLaughlin and Franklin and Helene Bracken Scholarship
Trevor King	NSERC CGS Doctoral Award (Alexander Graham Bell Canada Graduate Scholarship)
Brendan Levac	NSERC Master's (Natural Sciences and Engineering Research Council of Canada (CGS M)
Janette Leroux	R.S. McLaughlin and Franklin and Helene Bracken Scholarship
Jasmin Ma	OGS (Ontario Graduate Scholarship)
Renee Matte	SSHRC Master's (Joseph Armand Bombardier CGS Master's Scholarship)
Victoria Millious	SSHRC CGS Doctoral Award (Frederick Banting and Charles Best Canada Graduate Scholarship)
Meghan Plotnick	Graduate Entrance Tuition Award
Veronia Poitras	QEII-GSST (Queen Elizabeth II Graduate Scholarship in Science and Technology
Jon Salsberg	CIHR CGS D Doctoral (Frederick Banting and Charles Best Canada Graduate Scholarship

Graduate Student Funding Award Recipients 2013 (con't)

Jennifer Turnnidge	SSHRC Doctoral (Joseph Armand Bombardier Canada Graduate Scholarship)
Matthew Ventresca	SSHRC CGS Doctoral Award (Frederick Banting and Charles Best Canada Graduate Scholarship)
Matthew Vierimaa	SSHRC CGS Doctoral Award (Frederick Banting and Charles Best Canada Graduate Scholarship)
Jeremy Walsh	R.S. McLaughlin and Franklin and Helene Bracken Scholarship
Jennifer Wigglesworth	SSHRC CGS Doctoral Award (Frederick Banting and Charles Best Canada Graduate Scholarship)

TOTAL of 28 award recipients out of 67 eligible students

Mary Louise Adams
Socio-Cultural Studies

Research
My research program investigates the relationship between bodies, styles of movement, and discourses about gender and sexuality. Gendered styles of movement are important means of differentiating social groups and are powerful representations of ideology, the more so because they feel and appear so natural. Yet the types of movement considered appropriate for male and female bodies are far from natural; they evolve in particular historical and cultural contexts. I explore how conventions of movement are linked to common sense knowledges about gender, sexuality and sport. How should male and female bodies move? What should they look like? In what contexts should they appear? How do we experience them? My work's goal is to complicate our understanding of factors that shape social inequities and to look at the effects of everyday cultural forms like sport and dance on gender and sexual identities.

Research
What features best predict physical performance? In large part the features will be different for different populations. Factors that predict maximum walking speed in a person with knee osteoarthritis will be different from factors that predict maximum walking speed in a healthy person. Previous work suggests that for patient populations self-confidence is an important component of success in many mobility situations and as we move to more physically demanding activities, self-confidence becomes less important while physical capacity becomes more important. Our current research focusing on lower limb loading during activities of daily living investigates the load demand of these activities. We hope to begin examining the relationship between the demand of the activity, one's physical capacity and the success of performance. Our goal is to understand the requirements of successful performance so that we can set reasonable goals for elderly exercise programs, rehabilitation outcomes and make informed decisions on issues such as community living and return to sport after surgery.

Jean Côté
Psychology of Sport

Research
My research interests focus on the developmental and psychosocial factors that affect sport participation and performance. I am interested in the complex interaction of athletes, parents and coaches in the personal development of youth through sport. The purpose of my research is to identify variables and behaviours within family, athletes, and coaches that create favourable conditions for excellence and participation in sports. This program of research uses various qualitative and quantitative methodologies including unstructured and structured interviews, observation, video-task analysis, and questionnaires.

Stevenson Fergus
Health Promotion

Research
My research interests focus on inequalities in health. Specifically, why people engage in health-compromising behaviours--particularly sexual risk behaviour and substance use--with the aim of identifying how to design successful public health interventions. The grave effect that HIV/AIDS has had in North America and globally; the disproportionate effect that HIV/AIDS has had on youth and marginalized people such as racial, ethnic, and sexual minorities; and the preventability of behaviours that put one at risk of contracting HIV, have led me to focus my work in this area. The two theoretical approaches that frame much of my thinking and work are the social ecological model and resilience theory.

Steve Fischer
Biomechanics

Research

My research mission is to perform world class musculoskeletal biomechanics research to promote optimal functional performance. Guided by this mission my research interests intersect traditional ergonomics (measuring demands) and kinesiology (measuring capacity) approaches in order to minimize injury risk and optimize performance in the workplace. Within this paradigm, my research is focused within the following themes:

1. **Characterizing Occupational Demands** – Developing new strategies or employing existing strategies to describe and classify relevant features of occupational demand within targeted employment sectors.
2. **Characterizing Functional Capacity** – Developing new strategies or employing existing strategies to describe and classify relevant features of functional capacity with reference to occupational and life demands.
3. **Modeling and Optimizing Performance** – Innovating creative methods, tools and/or models to seamlessly link demands and capacities in a manner that allows us to determine the ideal overlap for optimal injury free performance.

Brendon Gurd
Muscle Physiology

Research

My primary research aim is to understand the mechanisms by which both different intensities and different types of exercise improve mitochondrial function. In addition, I am interested in the impact that these improvements in mitochondrial function have in both health and disease. My research is currently has 3 main goals. First, to quantify the intensities of various different types of exercise across a range of skill and fitness levels. Second, to examine changes in both whole body fitness and mitochondrial function following exercise training of differing types and intensities and how these changes differ between active, sedentary, and overweight/obese young adults. Third, to elucidate the molecular mechanisms underlying exercise induced mitochondrial biogenesis, specifically, to explore post-translational regulation of PGC-1alpha following exercise. It is hoped that this research will help increase our understanding of the mechanisms by which exercise can improve health and the optimal intensities and types of exercise to activate these mechanisms.

Ian Janssen
Epidemiology

Research
Although I have a broad research program, most of my research focuses on two health determinants, obesity and physical inactivity. As demonstrated by some of my own research, these health determinants are extremely prevalent in Canada, have a substantive impact on several chronic diseases and mortality, and place a considerable economic burden on the population. I employ population and public health based research approaches to study these health issues. In epidemiological terms, most of the research I conduct is observational in nature and includes both cross-sectional and prospective cohort studies that include thousands of participants. My current research focuses on two areas. Frist, to develop evidences that can be used to improve public health guidelines for physical activity and sedentary behaviour. Second, to determine what features of the built environment (e.g., street networks, playgrounds, local food retailers) influence dietary patterns, physical activity, and obesity in youth.

Socio-Cultural Studies
of Sport, Health and the Body

Research
My research and teaching engage the embodied dimensions of contemporary consumer culture, focusing on three main subjects: i)the breast cancer fundraising industry, ii) prescription painkilling, and iii) sport, racialized sexuality, and the state. These interests are collectively motivated by my commitment to understanding and undoing social injustices related to the body, health and physical culture. My work is designed to engage scholarly, mass media, and community audiences who share or might be persuaded to share, this commitment. My book, *Pink Ribbons, Inc: Breast Cancer and the Politics of Philanthropy*, is the subject of an acclaimed National Film Board documentary of the same name. I am currently working on a manuscript about OxyContin in Ontario, a project funded by the Canadian Institutes of Health Research. In addition to writing scholarly articles and book chapters in a number of journals and edited collections, I have written for the *Toronto Star*, the *National Post*, and *CNN.com.*

Amy Latimer-Cheung
Health Promotion

Research
My research aims to understand and promote healthy lifestyle behaviours in the general population and among people with chronic disease and disability. My research focuses specifically on a) identifying the factors that motivate people to adopt healthy behaviours, and b) testing motivational interventions to encourage people to make health lifestyle choices. Currently, I am conducting research examining the best approach for communicating health information. I am also working with researchers and practitioners from across Canada to develop an evidence-informed resource promoting the physical activity guidelines for Canadians living with multiple sclerosis.

Lucie Lévesque
Health Promotion

Research
Dr. Lévesque's intervention and research setting is the community. Her research approach is participatory. Over the past 15 years, she has mainly focused on physical activity intervention effectiveness evaluation from an ecological and holistic perspective. She is especially interested in enhancing the accessibility of physical activity opportunities for youth and has a keen interest in working with Indigenous communities to eliminate health disparities related to physical inactivity. Although most of her federally-funded research is in Canada, she has also collaborates with researchers in Mexico and has had the opportunity to train Mexican students and researchers interested in physical activity promotion and obesity prevention.

Spencer Moore
Population Health

Research
My work falls into the areas of: 1) Recent work in the field of social epidemiology has stressed the importance of neighbourhoods and locales for the health of individuals. We are currently conducting research in Montreal neighbourhoods on the association of individual and neighbourhood social capital, social networks, and collective efficacy with various risk factor and health outcomes, including physical activity, mental health, and obesity, using qualitative and quantitative methods. How are we to measure and understand global inequalities in health? This research is using the World Health Survey to examine the distribution of health within countries and between countries and the factors associated with current global inequalities in health. This line of research examines inter-organizational networks as the key to measuring public health preparedness and assessing how inter-organizational relationships contribute to an overall responsive and prepared public health system. This research is mainly quantitative in nature.

Socio-Cultural Studies of Sport, Health and the Body

Research
My research is focused on issues related to poverty, food, and health, particularly individual and household food insecurity, and the role of food banks in discourses of poverty. Drawing on literature from food studies, health studies and cultural studies, and using qualitative research methods, I explore social, cultural, political and symbolic aspects of food, eating, the body, and health. I am also interested in expanding the repertoire of qualitative research methods in food studies, particularly the use of visual methods, such as photography and video, and in using documentary film as a vehicle for "knowledge translation" to change public policy.

Kyra Pyke
Cardiovascular Physiology

Research

My interests focus on three interacting areas of human cardiovascular research: i) endothelial function, ii) autonomic function and iii) the physiological effects of psychosocial stress. The vascular endothelium is a single layer of cells that lines all of the blood vessels in the body. It exerts local control over vascular tone and also plays a key role in modulating atherosclerosis development. One branch of my research is aimed at i) improving our understanding of how the endothelium responds to changes in blood flow, ii) improving endothelial function assessment in humans, and iii) understanding how endothelial function changes with disease. The sympathetic branch of the autonomic nervous system increases heart rate and causes vasoconstriction. Acute changes in sympathetic nervous activity occur during exercise and are essential for blood pressure regulation. In contrast, the chronically elevated sympathetic nervous activity observed in some disease states (e.g. congestive heart failure and sleep apnea) contributes to pathological vascular adaptations. My interests lie in understanding how acute and chronic sympathetic nervous activation influence vascular tone, compliance and endothelial function. Psychosocial stress is associated with the development of cardiovascular disease, although the physiological basis of this connection is not fully understood. Initially focused on basic, mechanistic questions, this research will lead to an investigation of the ability of stress reduction interventions (e.g. stress management counseling) to improve physiological measures of cardiovascular function and health.

Bob Ross
Exercise Physiology

Research

Research work is focused on the characterization and management of obesity and related co-morbidities in adults. We conduct randomized controlled trials to determine the efficacy of lifestyle-based interventions designed to reduce abdominal obesity and related health. Our intervention-based research is performed within the Kinesiology and Health Studies building. This space includes the aerobic training equipment necessary to perform multiple intervention trials. Equipment for measurement of indirect calorimetry both during exercise and at rest is in place. Also included are 4 MRE- and CT-image analysis workstations. We also have routine access to MRI, CT and DEXA facilities at Kingston General Hospital. Our metabolic-based research is also performed within our 13000 square foot laboratory. Our metabolic unit houses 2 beds, office space for our research nurse(s) and two metabolic testing suites dedicated to performing our metabolic studies including hyperinsulinemic auglycemic clamp studies, glucose tolerance, glucose oxidation, resting metabolic rate measurement, etc.

Joan Stevenson
Ergonomics

Research

My research foci are centered on two main themes: reducing the prevalence of low back pain and improving the ergonomic design of equipment. My basic research program has been focused on factors that affect low back pain (i.e., spinal stability, lifting technique, and movement coordination). This research work has practical implications in two ways: 1) we are developing new tests that are more sensitive to the cause and extent of various types of back pain; and 2) we have developed an on-body personal lift assistive device (PLAD) that reduces back forces by 15-20% during lifting and forward bending tasks. This ergonomic aid has progressed from concept to the marketplace because of our research and currently being tested in several industries. We have also designed an ergonomic assist for professional movers that is currently in the final testing stage by moving companies. Another large-scale project is the development of load carriage simulators to mimic soldiers' motions as they walk, jog or run. We provided objective measures (pressure, forces, and motion) for the establishment of design standards and helped with the design of the new Canadian Forces load carriage system. We pride ourselves in maintaining a well-equipped laboratory to conduct a variety of research projects by faculty and students.

Michael Tschakovsky
Cardiovascular Physiology

Research

The primary research interest in my laboratory is to understand how the heart and blood vessels are controlled to adjust exercising muscle blood flow (and thereby oxygen supply) to meet the metabolic demand of exercising muscle. Our basic science research focuses on advancing our understanding of the mechanisms that initiate the increase in muscle blood flow when exercise begins, and how disturbances in exercising muscle blood flow are corrected. Our biomedical research focuses on advancing our understanding of how oxygen supply to exercising muscle is compromised in persons with Type II Diabetes (T2D), and identifying lifestyle (diet, exercise) and pharmaceutical interventions that might improve exercising muscle blood flow. The rationale for this research is as follows: It has been established that exercise is a critical lifestyle intervention for both the prevention and the management of T2D. However, persons with T2D are exercise intolerant. This exercise intolerance may be related to inadequate supply of oxygen to exercising muscle. It is anticipated that pursuit of our biomedical research objectives will result in the identification of the underlying cause(s) of impaired oxygen delivery during exercise in T2D, and interventions that effectively improve this impairment so that persons with T2D will tolerate and adhere to exercise as part of their lifestyle

United Way Community Investment Fund	Sustaining Revved Up Services	$15,000	2012-2013	Latimer-Cheung, A.E. (PI)
CFI – Infrastructure Operations Fund	Developing intervention models and dissemination strategies for promoting physical activity for adults with a mobility impairment	$22,850	2011-2016	Latimer, A.E. (PI)
Ontario Neurotrauma Foundation	Towards interventions focusing on community living and quality of life (COM-QOL) for individuals with spinal cord injury	$120,000	2011-2014	Latimer, A.E. (Co-PI)
SSRHC	Evaluation of instrumental, affective, and self-regulatory messaging on intention and behaviour	$104,488	2011-2014	Latimer, A.E. (Co-PI)

Funding Source	Project Title	Total Grant	Start/End	Researchers
CIHR	Developing an evaluation plan for a national physical activity policy	$25,813	2012-2013	Latimer-Cheung, A.E. (Co-I)
CIHR	ParticipACTION after 5 years: assessing impact on the promotion of physical activity and the behaviour of Canadians	$239,390	2012-2015	Latimer-Cheung, A.E. (Co-I)
CIHR	Developing physical activity guidelines for Canadians with multiple sclerosis: Phase 1: knowledge synthesis and consensus guidelines	$100,000	2011-2013	Latimer-Cheung, A.E. (PI)
CIHR Canada Research Chairs Program	Physical Activity Promotion and Disability	$500,000	2010-2015	Latimer, A.E. (PI)
Ontario Ministry of Research and Innovation	Early Researcher Award – Optimizing the Impact of Persuasive Messages Encouraging Canadians to Participate in Physical Activity	$150,000	2010-2015	Latimer, A.E. (PI)
SSHRC-CURA	Development, implementation, and assessment of physical activity-enhancing programs for Ontarians living with spinal cord injury	$948,780	2007-2013	Latimer, A.E. (Co-I/Team Leader)
National Council of Science and Technology (Mexico) CONACYT	Third stage of evaluation of the guidelines on consumption of food and beverages in schools and the obesogenic environment	$117,425 (MEX)	2013-2014	Lévesque, L. (Co-I)
CIHR	Dissemination of “Pausa Activa”, a strategy to enhance physical activity promotion in health care settings in Mexico: investigating program implementation and impact	$200,000	2013-2015	Lévesque, L. (PI)
CIHR	Youth driven development in Aboriginal communities: impact evaluation of the Active Circle Initiative	$1,012,095	2012-2015	Lévesque, L. (PI)
CIHR	National guidelines for the prevention of obesity in the Mexican school system: an investigation of policy implementation and impact	$200,000	2011-2013	Lévesque, L. (PI)
CIHR	Participatory policy intervention to promote school-based physical activity	$200,000	2011-2013	Lévesque, L. (Co-PI)
NIH (National Institute of Health)	Multinational collaboration to increase physical activity in Hispanics	$100,000	2011-2013	Lévesque, L. (Co-PI)
CIHR	Forming the Montreal Neighbourhood Networks and Healthy Aging Panel: A panel for future studies of social capital, neighbourhood environments, and health care system use over the life course	$99,571	2013-2014	Moore, S. (Co-PI)
Ontario Early Researcher Award	Investigating the social environmental and behavioural pathways links SES to CVD across the life course	$150,000	2010-2013	Moore, S. (Co-PI)
CIHR	Foundational work for a brain-to-society surveillance system for innovation in behavioural, public health, and cross-sector strategy to prevent childhood obesity and other lifestyle related health	$499,730	2010-2013	Moore, S. (Co-In)
CIHR	The buck stops here?.....	$10,000	2012-2013	Power, E. (Co-PI)

Funding Source	Project Title	Total Grant	Start/End	Researchers
SARC	A randomized controlled trial of Bikram yoga and aerobic exercise for the treatment of depression	$6,700	2013-2014	Pyke, K. (Co-I)
MRI Early Researcher Award (ERA)	The role of blood flow in shaping the function and structure of human arteries	$150,000	2010-2015	Pyke, K. (PI)
CFI Infrastructure	The function and structure of human arteries in health stress and disease *(operating funds for CFI LOF infrastructure)*	$25,000	2010-2014	Pyke, K. (PI)
NSERC	Discovery Grant – Individual – the role of shear stress and sympathetic nervous activity in the regulation of human arterial function and structure	$125,000	2009-2014	Pyke, K. (PI)
Senate Advisory Research Committee (SARC)	Stress reactivity and vascular health in patients with chronic pain	$10,000	2012-2013	Pyke, K. (PI)
Queen's University	Research Initiation Grant	$22,000	2008-2013	Pyke, K. (PI)
MRI	Leaders Opportunity Fund	$80,000	2009-2014	Pyke, K. (PI)
CIHR	Evaluating a small change approach to preventing long term weight gain in overweight and obese adults	$1,446,505	2013-2018	Ross, R. (PI)
CIHR	Dose-response effects ….	$1,850,363	2009-2014	Ross, R. (PI)
Allen-VanGuard Ltd	Quantitative biomechanical evaluation support the EOD 10 design program, objective 1: hip belt design support testing	$,6,400	2013	Stevenson, J. (PI)
PWGSC	Phase 7: Final construction and delivery of load carriage evaluation tools	$119,343	2012-2013	Stevenson, J.M. (PI)
SSHRC	Evaluating the efficacy of the research ethics education and training (REET) Program Part 2	$27,300	2012-2013	Stevenson, J.M. (Co-In)
PWGSC	Near term ideas to address aircrew system-induced neck pain	$54,923	2012-2013	Stevenson, J.M. (Co-In)
NSERC	Evaluation of strategies to improve measurement, evaluation and force requirements of the spine during manual handling tasks	$155,000	2011-2016	Stevenson, J.M. (PI)
NSERC Discovery Grant	Integrated cardiovascular control responses to PA in humans	$200,000	2011-2016	Tschakovsky, M.E. (PI)

6. Research Publications, Presentations and Related Activities

Summary of Faculty Member Activity for 2013

Research Activity Description - All Faculty Members Combined	Total Items
Articles in Peer-Reviewed Publications	90
Books, Book Chapter and Film Contributions	15
Conference Papers, Seminars, Abstracts and Other Presentations (refereed)	99
Keynote and Other Invited Presentations	67
Reports, Articles in Venues w/o Peer Review, Invited Articles	11
Reviews of Faculty Members' Own Works	2

Articles in Peer Reviewed Publications

1. **Adams, M.L**. No taste for rough and tumble play: sport discourses and the regulation of effeminacy, *GLQ* 19, no. 4 (2013), 515-543.
2. Hancock, D. J., Adler, A. L., & **Côté, J.** A proposed theoretical model to explain relative age effects in sport. *European Journal of Sport Science*, *13*, 630-637. DOI:10.1080/17461391.2013.775352 (2013)
3. Barreiros, A., **Côté, J.,** & Fonseca, A. M. Sobre o desenvolvimento do talent no desporto: Um contributo dos modelos teoricos do desenvolvimento desportivo. *Revista de Psicologia del Deporto, 22(2),* 489-494. (2013)
4. Barreiros, A., **Côté, J.,** & Fonseca, A. M. Training and psychosocial patterns during the early development of Portuguese national team athletes. *High Ability Studies, 24(1),* 49-61. (2013)
5. Bruner, M., Eys, M. A., Beauchamp, M. R., & **Côté, J**. Examining the origins of team building in sport: A citation network and genealogical approach. *Group Dynamics: Theory, Research, and Practice, 17, 1*, 30-42. DOI: 10.1037/a0030114 (2013)
6. Byford-Richardson, L., Walker, M., Muckle, W., Sprague, A., **Fergus, S.,** Rennicks White, R., and Dick, B. Barriers to access of maternity care in Kenya: A social perspective*. Journal of Obstetrics and Gynaecology Canada,* 35(2), 125-130. (2013)
7. **Fischer, S.L.**, Picco, B.R., Wells, R.P., Dickerson, C.R. The roles of whole body balance, shoe-floor friction and joint strength during maximum exertions: Searching for the "weakest link". *Journal of Applied Biomechanics*, 29(1): 1-11. (2013)
8. Cudlip, A.C., **Fischer, S.L.**, Wells, R.P., Dickerson, C.R. The influence of task frequency and force direction on psychophysically acceptable forces in the context of biomechanically weakest links*. Journal of Applied Biomechanics,* 29, 285-291. (2013)
9. Ma, J.K., Scribbans, T.D., Edgett, B.E., Boyd, J.C., Simpson, C.A., LIttle, J.P. and **Gurd, B.J.** Extremely low-volume, high-intensity interval training increses makers of skeletal muscle mitochondrial content in humans. OJMIP 2013: 202-210. (2013)
10. Edgett, B.A., Foster, W.S., Hankinson, P.B., Simpson, C.A., LIttle, J.P., Graham, R.B. and **Gurd, B.J.** Dissociation of Increases in PGC-1a and its Regulators from Exericse Intensity and Muscle Activation Following Acute Exercise. PLoS One 8: e71623. (2013)
11. Boyd, J.C., Simpson, C.A., Jung, M.E., and **Gurd, B.J.** Reducing the intensity and volume of interval training diminishes cardiovascular adaptation but not mitochondrial biogenesis in overweight-obese men. PLoS One 8: e68091. (2013)

12. Edgett, B.A., Fortner, M.L., Bonen, A. and **Gurd, B.J.** mTOR Pathway is Up-regulated by Both Acute Endurance Exericse and Chronic Muscle Contraction in Rat Skeletal Muscle. Applied Physiology, Nutrition and Metabolism 38: 862-869 (2013)
13. Smith, B.K., Mukai, K., Lally, J.S., Maher, A.C., **Gurd, B.J.,** Heigenhauser, G.J., Spriet, L.L. and Holloway, G.P. AMPK is required for exercise-induced PGC-1a translocation to subsarcolemmal mitochondria in skeletal muscle. Journal of Physiology 591: 1551-1561. (2013)
14. Szijgyarto, I.C., King, T.J., Ku, J., Poitras, V.J., **Gurd, B.J.,** and **Pyke, K.E.** The impact of acute mental stress on brachial artery flow mediated dilation differs when shear stress is elevated by reactive hyperemia vs. handgrip exercise. Applied Physiology, Nutrition and Metabolism 38: 498-506. (2013)
15. Gropp, K.M., **Janssen, I.**, Pickett, W. Active transportation to school in Canadian youth: should injury be a concern? *Injury Prevention*. 2013;19:64-67.
16. Carson, V., Tremblay, M.S., Spence, J.C., Timmons, B.W., **Janssen, I**. The Canadian Sedentary Behaviour Guidelines for the Early Years (zero to four years of age) and screen time among children from Kingston, Ontario. *Paediatrics & Child Health*. 2013;18:25-28.
17. **Janssen, I.**, Carson, V., Lee, I.-M., Katzmarzyk, P.T., Blair, S.N. Years of life gained due to leisure-time physical activity in the U.S. *American Journal of Preventive Medicine*. 2013;44:23–29.
18. Bouchard, D.R., Porneala, B., **Janssen, I.**, Langlois, M.F., Baillargeon, J.P., Pencina, M., D'Agostino Sr., R.B., Fox, C.S., Meigs, J.B., Hivert, M.F. Risk of type 2 diabetes is associated with cumulative excess weight exposure from mid-thirties to mid-fifties in the Framingham Offspring Study. *Journal of Diabetes Complications*. 2013;27(3):214-218.
19. Gotay, C.C., Katzmarzyk, P.T., **Janssen, I.**, Dawson, M.Y., Aminoltejari, K., Bartley, N.L. Updating the Canadian obesity maps: an epidemic in progress. *Canadian Journal of Public Health*. 2013;104(1):e64-68.
20. Héroux, M., Onywera, V., Tremblay, M.S., Adamo, K.B., Lopez Taylor, J., Jáuregui Ulloa, E., **Janssen, I**. The relation between aerobic fitness, muscular fitness and obesity in children from three Countries at different stages of the physical activity transition. *ISRN Obesity*. 2013; Article ID 134835.
21. Seliske, L., Pickett, W., Rosu, A., **Janssen, I**. The number and type of food retailers surrounding schools and lunchtime eating behaviours of students. *International Journal of Behavioral Nutrition and Physical Activity*. 2013;10:19.
22. Gee, M.E., Pickett, W., **Janssen, I.**, Johnson, J.A., Campbell, N.R. Health behaviors for hypertension management in people with and without coexisting diabetes. *Journal of Clinical Hypertension*. 2013;15(6):389-396.
23. Colley, R.C., Garriguet, D., **Janssen, I.**, Saunders, T.J., Carson, V., Tremblay, M.S. The association between accelerometer-measured patterns of sedentary time and health risk in children and youth: results from the Canadian Health Measures Survey. *BMC Public Health*. 2013;13:200.
24. Onywera, V.O., Héroux, M., Jáuregui Ulloa, E., Adamo, K.B., López Taylor, J., **Janssen, I.**, Tremblay, M.S. Adiposity and physical activity among children in countries at different stages of the physical activity transition: Canada, Mexico and Kenya. *African Journal for Physical, Health Education, Recreation and Dance*. 2013;19(1):134-144.
25. **Janssen, I**. The public health burden of obesity in Canada. *Canadian Journal of Diabetes*. 2013;37:90-96.

Keynote and Other Invited Presentations

1. **Adams, M.L**. Gender, sexuality, skating. Guest lecture in *KNH 475/574*, Miami University OH (29 Oct 2013).
2. **Adams, M.L.** Critical discourses on LGBT sports, invited panel presentation, *Sports and the LGBT Experience conference*, University of Southern California, Los Angeles, (Oct 2013).
3. **Adams, M.L**. Context is everything or Studying sport sociologically, collaborative presentation (with Sarah Barnes, Marty Clark, Kyle Clarke, Flurry Hogg) for *Graduate Seminar, SKHS, Queen's University*, Kingston ON (09 Oct 2013).
4. **Adams, M.L.** Applying for SSHRC Insight Grants, presentation for *Office of Research Services, Queen's University,* Kingston ON (10 Jul 2013).
5. **Adams, M.L.** Artistic impressions. Invited presentation on receipt of WGSRF Outstanding Scholarship Award, Women's and Gender Studies et *Recherche Féministe conference,* Victoria BC. (May 2013).
6. **Adams, M.L.** Discussant commentary, session on Bodies and evidence, *North American Society for Sport History*, Halifax NS. (May 2013).
7. **Côté, J.** Pathways to expertise in team sport. Paper presented at *the 4th Congresso Internacional De Jogos Desportivos*. Florianopolis, Brazil. (06-08 Nov 2013) (Keynote)
8. **Côté, J.** The structure of youth sport: Pressure and possibilities. Paper presented at *the International Conference on Sport and Society*. Chicago, United States. (13-15 Jun 2013) (Keynote)
9. **Côté, J.** Coaching effectiveness: What is it? Paper presented at the *Provincial* (KwaZulu-Natal) *Coaching Conference*. Durban, South Africa. (Sep 2013) (Invitation)
10. **Côté, J.** The activities and structure of youth sport: Coaching Implications. Paper presented at *the 9th International Council of Coaching Excellence (ICCE).* Durban, South Africa. (Sep 2013) (Invitation)
11. **Côté, J**. Novel ways to analyze behaviours in coaching research. Paper presented at *Research Fair of the International Council of Coaching Excellence (ICCE).* Durban, South Africa. (Sep 2013) (Invitation)
12. **Côté, J.** The impact of early childhood activities an environment on long-term engagement in sport. Paper presented at the *Seminar Series of the University of Calgary, Faculty of Kinesiology*. Calgary, Canada. (Jun 2013) (Invitation)
13. **Côté, J.** The interplay of practice, play, and the environment in the development of athletes. Paper presented at *Pan Pacific Conference of Medicine and Science in Sport*. Honolulu, Hawaii. (Feb 2013) (Invitation)
14. **Fischer, S.** Near-term ideas to address aircrew helmet systems–induced neck pain. *Defence Research and Development Canada (DRDC)*, Toronto ON. (Mar 2013).
15. **Janssen I**. Influence of the Built Environment on Obesity, Physical Activity, and Healthy Eating in Children. Presented at *Public Health Ontario Grand Rounds.* Toronto, ON. (12 Feb 2013). (Invited Lecturer)
16. **Janssen I**. Energy Out: What Should We Be Doing? Presented at Food & Consumer Products of Canada, *Thinking Outside the Box Childhood Obesity Forum.* Mississauga, ON. (09 Apr 2013). (Invited Lecturer)
17. **Janssen I.** Get Off Your Chair: Too Much Sitting is Bad for Your Health. Presented at *KFL&A Public Health Unit workshop on Workplace Wellness*. Kingston, ON. (19 Apr 2013). (Invited Lecturer)
18. **Janssen I.** Get Off Your Chair: Too Much Sitting is Bad for Your Health. Presented at *Benefits by Design.* Kingston, ON. (04 Jun 2013). (Invited Lecturer)
19. **Janssen I.** Obesity: Definition, Prevalence, and Costs. Presented at the *Canadian Obesity Network Obesity Boot Camp*. Kananaskis, AB. (22 Jul 2013). (Invited Lecturer)
20. **Janssen I.** Physical Activity, Sedentary Behaviour, and Health in School-Aged Children and Youth. Presented at *City of Kingston Physical Literacy town hall.* Kingston, ON. (07 Nov 2013). (Invited Lecturer)
21. **Janssen I.** Physical Activity and Sedentary Behaviour in the Early Years. Presented at *KFL&A Public Health Unit workshop on Making the Move to Physical Activity in the Early Years*. Kingston, ON. (13 Nov 2013).

(Invited Lecturer)

22. **King, S.** *Pink Ribbons, Inc.* screening and Q&A. Towson University, Towson, MD. (2013)
23. **King, S**. Senior Scholar Panel. *Sports and Sexuality Conference*. University of Southern California, Los Angeles, CA. (2013)
24. **King, S.** *Pink Ribbons, Inc.* screening and Q&A. Ottawa Integrated Cancer Centre, Mayfair Theatre, Ottawa ON (2013)
25. **King, S.** Oxy in Ontario: The multiple materialities of prescription painkillers. *University of British Columbia*, Vancouver BC (2013)
26. **King, S.** Theorizing OxyContin: Women, painkillers, and the racial state. *University of North Carolina at Greensboro*, NC. (2013)
27. **King, S.** Panel discussant at *Pink Ribbons, Inc.* screening. *Southeastern Women's Studies Association, University of North Carolina*, Greensboro, NC. (2013)
28. **King, S.** The unintended consequences of pink: Reorienting the cause. *Purdue University*, West Lafayette, IN. (2013)
29. **King, S**. *Pink Ribbons, Inc.* screening and Q&A. *Providence College,* Providence, RI. (201)
30. **King, S.** *Pink Ribbons, Inc.* screening and Q&A. *University of Rhode Island,* Providence, RI. (2013)
31. **King, S.** How shopping for a cure undermines women's health. *Nancy's Chair Public Lecture, Mount Saint Vincent University*, Halifax NS (2013)
32. **King, S.** *Pink Ribbons, Inc.* screening and Q&A. *Cinema Politica/Octopus Books*, Ottawa ON (2013)
33. **King, S.** Theorizing OxyContin: Women, painkillers, and the racial state. *Gender Studies Brown Bag, Queen's University.* (2013)
34. **Latimer-Cheung, A.** *Ontario Physical and Health Education Association. Let's talk about physical activity messages.* Ontario Webcast. (Mar 2013)
35. **Latimer-Cheung, A.** *McMaster University Physical Activity Centre for Excellence.* You have the power. The role of peer physical activity advocates. *(Sep 2013)*
36. **Lévesque, L.** Ideas and opportunities to address childhood obesity and inactivity in Canada: investments to follow? *Third Pan American Conference on Obesity*, Oranjestad, Aruba. (Jun 2013)
37. Social capital and network influences on smoking (re)uptake: a follow-up study of Montreal, Canada adults. **Spencer Moore**, Ana Teixeira, Steve Stewart. *International Conference on Tobacco Prevention and Control.* Lisbon, Portugal. (14-15 Nov 2013).
38. Examining the Congruence Between Subjective and Objective Health Among Elder Women. Laure Sabatier, **Spencer Moore**. *Third International Conference on Aging and Society*. Chicago IL 08-09 Nov 2013.
39. Social capital, health inequalities and development. **Spencer Moore**. In-Progress 2. International *Seminar on Social Sciences and Development in Africa*. Lisbon, Portugal. (24 Oct 2013). (Keynote)
40. Self-reported Health and Metabolic Syndrome Among Older Women: Understanding a Cognitive Process." Poster Presentation. Laure Sabatier, **Spencer Moore**. *Canadian Public Health Association* meetings. Ottawa, ON. (09-12 Jun 2013).
41. Kingston, ON Adolescents' Perceptions and Knowledge About the Social Determinants of Health. Oral Presentation. Kelly Kenny, **Spencer Moore**. *Canadian Public Health Association meetings*. Ottawa, ON. (09-12 Jun 2013).
42. What's Proximity Got to Do With It?: A Systematic Review of the Mechanisms Linking Geographical Proximity to Health in the Built Environment Literature. Oral Presentation. Janette Leroux, **Spencer Moore**. *Canadian Public Health Association meetings*. Ottawa, ON. (09-12 Jun 2013).
43. **Power, E.** If it weren't there I wouldn't be in school: University students' experiences of using a campus food bank. Presented to the *Joint Annual Meeting of the Association for the Study of Food and Society & The Agriculture, Food & Human Values Society*, East Lansing, MI (21 Jun 2013).
44. Beagan, B.L., **Power, E.,** Chapman, G.E. Marking class boundaries through food consumption: I'm in budget mode, that's how I was raised. Presented to the *European Sociological Association conference*, Turin, Italy (28-31 Aug 2013)

45. Hiebert, B., & **Power, E.** How Canadian national media maintain settler colonialism and cultural hierarchies in their portrayal of Nunavut food insecurity. Presented at the *ArcticNet Annual Scientific Meeting,* Halifax, NS (11 Dec 2013).
46. **Power, E.** Neoliberalism is Killing Us!, Invited Speaker. *Council of Canadians, Brockville Chapter Semi-Annual Meeting*, Brockville, ON, (21 Jun 2013).
47. **Power, E**. Understanding Food Insecurity. Invited Speaker, Soul Food Seminar, *Queen's University*. Kingston ON (13 Mar 2013).
48. **Power, E.** Hunger: Can we bring food security to our community? Invited Speaker, Kingston Community Foundation. Kingston ON (04 Mar 2013).
49. **Pyke, K.** Human Mobility Research Centre invited seminar presentation. Anxious Arteries: The impact of mental stress on vascular function. Invited presentation. (27 Feb 2013)
50. **Ross, R.** Is Exercise for Weight Loss Overrated*? 55th International Council for Health, Physical Education, Recreation, Sport & Dance, Anniversary World Congress Physical Activity Symposium*, Istanbul, Turkey (19 Dec 2013) Invited Speaker
51. **Ross, R.** Physical Inactivity: the Smoking of the 21st Century. *55th International Council for Health, Physical Education, Recreation, Sport & Dance, Anniversary World Congress Physical Activity Symposium*, Istanbul, Turkey. (19 Dec 2013) Invited Speaker
52. **Ross, R.** Is Exercise for Weight Loss Overrated? *Queen's Faculty of Health Science, Human Mobility Research Center*. Kingston ON (04 Dec 2013) Invited Speaker
53. **Ross, R.** Should Physical Activity Questionnaires be Incorporated into Clinical Practice as a Vital Sign? Critical Review of Tools to Use for Assessing Physical Activity, *American Heart Association,* Dallas TX (19 Nov 2013) Invited Speaker
54. **Ross, R.** Is Physical Activity a Viable Treatment for Obesity? *The Obesity Society/American College of Sports Medicine Symposium*, Atlanta, GA (15 Nov 2013) Invited Speaker
55. **Ross, R.** Sedentary Lifestyle: the Smoking of the 21st Century. *Kingston General Hospital, Medical Grand Rounds,* Kingston ON (03 Oct 2013) Invited Speaker
56. **Ross, R.** The Other 23 ½ Hours in the Day – Beyond Physical Activity. *Canadian Diabetes Association*, Ottawa ON (30 Sep 2013) Invited Speaker
57. **Ross, R.** Sedentary Lifestyle: the Smoking of the 21st Century. *Eat Well, Drink Well, Move*, Brussels, Belgium (17 Sep 2013) Invited Speaker
58. **Ross, R.** Physical Activity/Exercise in the Management of Abdominal Obesity. *4th International Congress on Abdominal Obesity,* Seoul, South Korea (14 Sep 2013) Invited Speaker
59. **Ross, R.** Physical Activity as a Strategy for Management of Patients with Type 2 Diabetes. Diabetes Management in the Community, Diabetes Level 1, *Ontario Pharmacists Association,* Toronto ON. (20 Jun 2013) Invited Speaker
60. **Ross, R.** Physical Activity and CVD Risk Management. *81st European Atherosclerosis Society Congress*, Lyon, France. (03 Jun 2013) Invited Speaker
61. **Ross, R.** Energy Flux: Workload, Weight Management and Appetite Control. *American College of Sports Medicine, 60th Annual Meeting,* Indianapolis, Indiana, USA (31 May 2013) Invited Speaker
62. **Ross, R.** Obesity: Beautiful Hypothesis, Unpleasant Facts? *American College of Sports Medicine-Exercise is Medicine-Annual General Meeting,* Indianapolis, Indiana, USA (30 May 2013) Invited Speaker
63. **Ross, R.** Cardiorespiratory Fitness as a Risk Factor: Challenges and Opportunities for Implementation in Primary Care. *American College of Sports Medicine-Exercise is Medicine, Annual General Meeting*, Indianapolis, Indiana, USA (29 May 2013) Invited Speaker
64. **Ross, R.** Moving Patients from Sedentary to Physically Active: Challenges and Opportunities. *The Science and Business of Weight Management for the New or Experienced Practitioner,* Philadelphia, Pennsylvania, USA (26 May 2013) Invited Speaker
65. **Ross, R**. Is Exercise for Weight Loss Overrated? *3rd Canadian Obesity Summit,* Plenary Hot Topics and Controversies, Vancouver BC (03 May 2013) Invited Speaker
66. **Ross, R.** Beyond Weight Loss: A Revised Approach. Physical Activity and Weight: What Really Makes the Difference for Heart Health? *3rd Canadian Obesity Summit,* Vancouver, British Columbia, Canada (02 May 2013) Invited Speaker

67. **Ross, R.** A Revised Approach for Managing Obesity in Clinical Practice. *62nd Annual Refresher Course for Family Physicians,* Ottawa, Ontario, Canada. (25 Apr 2013) Invited Speaker

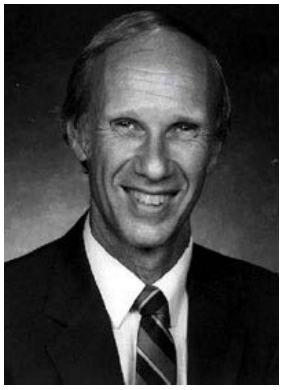
12. **Lévesque, L.** Ontario Volunteer Service Award for 10 years of service to the *Heart and Stroke Foundation of Ontario.*

Honours and Awards Related to Research

1. **Adams, M.L.** Women's and Gender Studies Association Outstanding Scholarship Prize, 2013 (for *Artistic Impressions*)
2. **Ross, R.** Canadian Society for Exercise Physiology 2013 Honor Award (highest honor awarded by EP)

Donald Macintosh Conference



1931 - 1994

This special conference is held annually in memory of Dr. Donald deFrayne Macintosh who passed away in 1994. He was a faculty member in the School of Kinesiology and Health Studies (then School of Physical and Health Education), from 1965 to 1994. He was appointed Director in 1965 and provided exceptional leadership for sixteen years before returning to teaching and research. Friends and colleagues at Queen's created a special fund to honour Dr. Macintosh, called the Donald Macintosh Memorial Visiting Scholar Fund, which is used to bring prominent scholars in the field of sociology of sport or sport policy to Queen's University to provide the keynote lecture at this one day event. **This year's conference was held on 19 Jan 2013. Dr. Cathy van Ingen, Department of Kinesiology, Brock University** hosted the keynote presentation entitled: Ruptures, right hooks, and ring work: A methodology of "getting lost" working with survivors of violence.
