|                                | <p>Winter 2022 – Topic ID: Globalization and Black Health</p> <p>Globalization provides a key context for the study of social determinants of health (SDH): the conditions in which people live and work, and their access to opportunities for healthy lives and wellbeing. This new world order is marked by new actors, new rules of governance, new forms of communication, and the global movement of populations. This course will examine economic, social, technological and importantly the political dimensions of globalization and how these impact the health and wellbeing of Black populations, identifying opportunities and risks.</p> |  |

| Comments                    | Included in the <i>Physical Activity, Epidemiology and Health Promotion</i> category of the KINE plan requirements.  |  |
| Description                 | Most people spend most of their waking hours sitting, an unhealthy behaviour that has only worsened during the COVID-19 pandemic. Excessive sitting, or sedentary behaviour, is a very different behaviour than a lack of exercise as the physiology, health implications, and effective interventions and policies are quite different. This course will provide an in-depth exploration of sedentary behaviour. Students will learn about important sedentary behaviour terms and concepts, sedentary habits from an evolutionary perspective, sedentary behaviour physiology, the determinants of sedentary behaviour, the health effects of excessive sedentariness, and effective strategies for reducing sedentary time in different settings.                         |  |

| HLTH 493/3.0                | Advanced Topics in Health Studies I<br>Topic ID: Population Health & Health Equity: Local to Global Perspectives   | Winter Term<br>Lee, E-Y.   |
| Comments                    | Included in the <i>Physical Activity, Epidemiology and Health Promotion</i> category of the KINE plan requirements.  |  |
| Description                 | Population health is a field of research and practice concerned with “the health outcomes of a group of individuals, including the <i>equitable</i> distribution of such outcomes within the group (Kindig & Stoddard, 2003).” Populations may be defined by sociodemographic characteristics such as gender, race/ethnicity, or social class, geographical area/country membership, disease states, or by enrollment in a health care plan. Population health takes an upstream approach, focusing on the social determinants of health and fundamental issues of health equity (e.g., sexism, racism, classism, elitism, ageism, ableism). In this course, we will explore the ways we can achieve population health and health equity from local and global perspectives. |  |

| HLTH 495/3.0                | Advanced Topics in Health Studies II<br>Topic ID: Racism and Health  | Winter term<br>Kangmennaang, J.  |
| Comments                    | Included in the <i>Psychology and Socio-Cultural Studies of Physical Activity and Health</i> category of the KINE plan requirements.   |  |
| Description                 | This course focuses on Black communities, including health inequities, the impact of structural racism, and resilience. The fundamental goal of the course is to demonstrate that health is not merely a medical or biological phenomenon but more importantly the product of social, economic, political, and environmental factors. To meet this goal the course is designed to examine the intersection of race/ethnicity and health from multiple analytic approaches and methodologies. The course will provide a strong understanding of Blackness and race as historically produced social constructs as well as how race interacts with other axes of diversity and social determinants to produce particular health outcomes. |  |

|--------------|--|---|
| HLTH 497/3.0 | Special Topics in Health Studies<br>Topic ID: Environment & Health   | Winter term<br>Bisung, E.   |
| Comments     | Not offered on a regular basis.  |   |
| Description  | This seminar course provides advanced review of the major theoretical and epistemological approaches to the study of environment and health. Students will be exposed to academic literature across several disciplines that engage with environment-health nexus. The course is designed to provide a strong foundation for students interested in continuing into graduate level studies or public advocacy roles in population health promotion and related fields, with competencies in concepts and practices pertaining to ecohealth, therapeutic landscapes, One health, planetary health, and other current paradigms. |   |
| Archived     | Fall 2019  | Topic ID: <i>Ecological Embodiment: The Politics of Food, Fitness, and the Environment</i> (King, S.)                                   |
|              | Winter 2018  | Topic ID: <i>Cultural Embodiment in Powwow</i> (Meness, J.)   |
|              | Summer 2017  | Topic ID 1: <i>Global Health Communication</i> (TBA) offered at the Bader International Study Centre at Herstmonceux Castle in England. |

## Timetabling Notes

- The [Arts & Science Calendar](#) is the final authority on all course information. (An “equivalent” prerequisite would be a course with academic content like that of the prerequisite, e.g. a course taken at another university).
- The official Course Timetable (University Registrar) is scheduled to be posted on SOLUS on **JULY 23** and is subject to change up to the beginning of classes. It is the final authority on time and location of classes.
- If a course is not listed in the official Course Timetable on SOLUS it will **not** be offered. (Not every course in the Arts & Science Calendar is scheduled every year due to faculty sabbaticals and other professional commitments).
- This SKHS Draft Timetable does not include times and locations of classes but is intended for planning purposes.
- Students are advised to consult the [SKHS Registration](#) website for updates (see date in footer of this Draft Timetable to ensure you are working with the latest version). This document is subject to change.
- **Warning: All courses have enrolment limits, be sure to select your courses at your assigned time.** Print off the Registration Timelines and post it where you can see it!
- Each course clearly states which courses are available to students in specific degree plans and years during courses.

## Registration Tips and Hints

Registration can be confusing. There are some important websites that can help you navigate the process.

### [Class Registration in Arts and Science](#)

#### *Course Registration Checklist*

- The important dates and tasks of registration.

#### *Academic Advisement in SOLUS*

- How to use the planner in SOLUS to ensure you are meeting your degree requirements.

#### *Course Wait Lists FAQ's*

- Tips and hints on how to use the wait lists on SOLUS to your advantage.

#### *Timetabling*

- Worksheet to help you with your timetable.

## Office of the University Registrar – Registration

### Registration Basics

#### *Step 1: Selecting your Courses*

- Explanation of course selection (appointment times), open enrolment (July) and open enrolment (before classes).
- Preloaded courses.

#### *Step 2: Paying your Tuition / Student Assistance Levy*

- Finding out what you owe.
- Cannot pay your Tuition and Student Assistance Levy (SAL) by the deadline?

#### *Step 3: Validating your Student ID Card*

#### *Step 4: Withdrawal from Studies*

- If you are unable to attend university in the coming year, follow these steps.

### Managing Academics

**Topics include:** Academic Planner; Apply for Graduation; Class Schedule; Course History; Enrolment Appointments; Enrolment Verification; Enrolment – Add Classes; Enrolment – Drop Classes; Enrolment – Edit; Enrolment – Swap Classes; Exam Schedule; Grades; Program/Plan Selection; Transcript – Request Official; and, Transcript – View Official.

#### Swapping a Course on SOLUS (found in Managing Academics above)

- Screen shots will show you step-by-step how to drop a course and add another one in one step.
- Use “swap” to ensure you don’t lose a place in the original course if the available seat in the preferred course is taken before you confirm your registration into it.

## SKHS Contact Information

The School of Kinesiology and Health Studies works as a team during registration to ensure that we are not duplicating our efforts during the busiest time of the year. Please email the correct person. *Do not send the same email to multiple people (we will forward to the correct contact if needed).*

- ❖ During peak periods in registration, there may be an unavoidable delay in response – we thank you in advance for your patience.
- ❖ Including your full name, student number, program and year in your email allows us to respond more quickly.

[Contact Us](#)

All emails must include: name as it appears on SOLUS; student number; program; and, year.

Draft Timetable 2021-22

The SKHS controls enrolment into HLTH and KNPE courses. If you need registration assistance with other courses, you will need to contact the appropriate department (e.g. access to course, prerequisite issues and so on).

| Course Code               | "Contact Us" Websites  |
