

<p>Course Name:</p> <p>HLTH 493/3.0</p> <p>Advanced Topics in Health Studies I Winter 2022</p> <p>Topic ID: Population Health and Health Equity: Local to Global Perspectives</p>	<p>Course Instructor:</p> <p>Dr. Young Lee</p>	<p>Contact Hours:</p> <p>Sessions: 1 x 3 hrs / 12 weeks</p>
		<p>Prerequisite:</p> <p>Level 4 in a HLTH (Major or Medial), PHED or KIN Plans.</p>
		<p>Exclusion:</p> <p>None</p>
<p>Course Description:</p> <p>Population health is a field of research and practice concerned with “the health outcomes of a group of individuals, including the equitable distribution of such outcomes within the group (Kindig & Stoddard, 2003).” Populations may be defined by sociodemographic characteristics such as gender, race/ethnicity, or social class, geographical area/country membership, disease states, or by enrollment in a health care plan. Population health takes an upstream approach, focusing on the social determinants of health and fundamental issues of health equity (e.g., sexism, racism, classism, elitism ageism, ableism). In this course, we will explore the ways we can achieve population health and health equity from local and global perspectives.</p>		<p>Course Texts:</p> <p>TBD</p>
